

WAI Trails

Every marked trail. The day's **conditions**. Free.

A free map of the world's hiking and cycling routes - with the weather, the risks and the wildlife for the day you plan, a 3D fly-through of every route, and a community of walkers.

User guide

WELCOME

What is WAI Trails?

WAI Trails puts every marked hiking and cycling route on one free map - and tells you what that route will be like on the day you go. No app to install, no account needed to look around.

36

countries in the guide

120

regions to pick from

131best-known routes, by
name**100%**

free to use

What you can do

Find a route

By continent, country and region, near you, or by searching a town or mountain. Filter by month, difficulty and length.

Know the route

Length, walking time, height gain, highest point, height profile, stops and the best months of the year.

Plan your day

Weather, snow and ice, avalanche terrain, floods, fires, earthquakes, daylight, hunting season - for the date you choose.

Meet the wildlife

The animals and plants recorded around the route, with photos - and a clear warning where bears or vipers live.

Fly it in 3D

Watch the route from a walker's or a drone's eye over real terrain - and save it as a video to share.

Join the community

Rate routes, add photos, mark springs, huts and hazards, share your GPX tracks and save your favourites.

Where to start: open wht-ai.com/trails on your phone or computer. The map opens on your own country and, if you allow it, right where you are.

Where the routes come from

The routes are the ones marked by volunteers on OpenStreetMap, read and kept up to date by WaiMAP, plus the routes WAI draws itself and the world's best-known routes, described by name. Heights come from satellite terrain data, the weather from MET Norway, wildlife records from GBIF - all open data.

STEP ONE

Find your route

- 1 **Continent → Country → Region.** The three boxes at the top take you straight to an area. The map flies there and the list shows its routes.
- 2 **Near me.** One tap shows the trails around you.
- 3 **Search.** Type a town, a mountain or a region ("Kaçkar", "Chamonix", "Lake District").
- 4 **Filters.** Best month ("good now"), difficulty (easy to expert) and length.
- 5 **Hide the list.** The ◀ button on the edge gives the whole screen to the map.

The ★ **best-known routes** of the area appear first, in yellow, with their difficulty, time, highlights and how to reach the start.

The numbers of every place

Pick a continent, a country or a region and a small panel shows how many routes it has, the total kilometres, the mix of easy, moderate, hard and expert routes, and its longest and highest route.

STEP TWO

Everything about one route

Tap a route on the map or in the list. Its page opens with all you need before you go.

The essentials

Length, walking time (estimated for a fit adult without long stops), height gain, highest point, a height profile, the stops along the way and the best months.

► Fly in 3D • ● Record video

Watch the route over real terrain as a walker or from a drone, on the map or satellite view - and save the flight as a video.

↓ GPX • Share

Take the route to your watch or phone app, or send its own page to friends - every route has its own web address.

📱 Open / Plan in WAI Sense

Continue in WAI Sense, WAI's outdoor app: guidance on the trail, recording, offline use and alerts.

STEP THREE

Plan your day - weather, risks, wildlife

Choose the date in **Plan your day**. WAI checks the route for that day and gives an overall word: **good to go**, **possible with care** or **not recommended** - with the reasons.

11	Route 19790750	LOC	0.8 km	-	-	0.9 km
12	Route 19757180	LOC	0.5 km	+25 m	-	1 km

Sat 17  15° / 10° overcast · 0%	Sun 18  12° / 9° rain · 0%	Mon 19  15° / 10° fog · 0%	Tue 20  14° / 10° rain · 0%	Wed 21  10° / 4° rain · 0%	Thu 22  4° / -5° clear · 0%
--	---	---	--	---	--

Conditions and risks today - WHR1.1, 2026-10-17: OK - Good to go - usual care.

Level	Topic	What to expect	Source
OK	Daylight	Sunrise 07:50, sunset 18:45 (local, approx.) - 10.9 h of light. Start by 16:39 to finish in daylight (about 1.5 h walking).	Astronomical calculation
OK	Weather on Sat 17 Oct	15°C by day low down, 15°C at the top (1122 m). Rain 0.5 mm, gusts up to 7 km/h.	MET Norway
OK	Snow and ice	No freezing expected on the route.	MET Norway

What is checked: the forecast at the start and at the highest point (up to 9 days ahead, the normal weather for the month after that), snow and ice, avalanche terrain, floods, wildfires and earthquakes nearby, daylight and when to start, pastures with shepherd dogs, harvest and hunting seasons.

Wildlife and plants recorded in the area

and hunting dawn and dusk and at weekends.

Conditions are WAI's reading of open data, not an official forecast. Always check local signs, mountain huts and official warnings before you go.

ASK IN YOUR OWN WORDS

Ask WAI about any trail

On **wh-ai.com** you can simply ask: *"Hiking trails near Chamonix"*, *"Likya Yolu Kabak - Faralya"*, *"Is Kaçkar OK this weekend?"* - in any language. WAI answers with a visual page.

Hiking trails near Chamonix

Hiking routes - Chamonix - WAI visual answer (the pages below are the answer as shown on screen).

Hiking routes - Chamonix

12 marked routes within 25 km · OpenStreetMap

Chamonix-Mont-Blanc, more commonly known simply as Chamonix, is a commune in the Haute-Savoie department in the Auvergne-Rhône-Alpes region in southeastern France. It hosted the first Winter Olympics, held in 1924. [Wikipedia ↗](#)

Routes

13.8 km

Longest

52 km

Total length

2,402 m

Highest point on a route

- ✓ The routes on a map, the best-known ones first, a 3D fly-through, the height profile and a comparison table.
- ✓ Today's (or the asked day's) weather, risks and wildlife.
- ✓ 🎬 **Make a video** turns the answer - maps, photos, numbers and the 3D walk - into a short film, made on your own device.
- ✓ **WAI Report (PDF)** keeps the whole answer as a document.

FREE

Your account and the community

Looking around needs no account. A free account adds:

- ✓ ♥ Save routes and find them on every device
- ✓ ★ Rate routes (1 to 5 stars) and write reviews
- ✓ 📷 Add your photos to a route
- ✓ 📍 Mark water, viewpoints, huts, parking and hazards on the map
- ✓ 🏠 Share your GPX track of a route
- ✓ ⬇ Download GPX and 🎥 record the 3D video
- ✓ 👤 "My WAI Trails": your saved routes and everything you added

Sign in your way

E-mail (with a 6-digit code), **Google**, **Microsoft** (**Hotmail** / **Outlook**) - or simply your **WAI Sense** account: if you use Sense on the same device, you are signed in on Trails automatically. One account works on WAI, WAI Sense and WaiMAP.

Privacy: only your first name is shown next to what you add. Photos are saved again by WAI without the camera's data, so your phone's GPS position is never published.

FOR EVERYONE

Who gets what from WAI Trails

**Walkers and cyclists**

Choose the right route for the day and your level, know the risks before you leave, take the route on your watch, and share your walk as a 3D video.

**Families and beginners**

Filter easy routes, see walking times and daylight, and find water, huts and parking marked by other walkers.

**Clubs and schools**

Plan group outings with the same map, share route pages with members, and teach nature with the wildlife records of each route.

**Villages and local guides**

Put local paths on the world map: the region list, the best-known routes and walkers' photos and reviews bring visitors to places they would never find otherwise.

**Websites and blogs**

Put a live map of any route on your own site - free - with its 3D fly-through. Find "For businesses" at the bottom of the list.

**Photographers and storytellers**

Your photos and reviews stay with the route, with your name, for every walker who comes after you.

Good to know

- ✓ Routes are as volunteers marked them on OpenStreetMap - check the trail state, local signs and the weather before you go.
- ✓ Times are estimates for a fit adult without long stops; height gain is computed from terrain data.
- ✓ In an emergency call your local number (112 in Europe and Türkiye).

Start in one minute

- 1 **Open wht-ai.com/trails** - on your phone or computer.
- 2 **Pick a region** - or tap  to see the trails around you.
- 3 **Tap a route** - read its page and choose your date in "Plan your day".
- 4 **Fly it in 3D** - then take the GPX with you.
- 5 **Back home** - rate it, add a photo, help the next walker.
